

# PSC Better Than Paint News

**The Coast Hotel & Resorts** was faced with two problems; a 40 year old building that was in desperate need of an update through a colour change. Secondly the building's exterior stucco was cracked and either had to be waterproofed or replaced.

With a costly stucco replacement project in front of them they turned to the **PSC Better Than Paint** to seal and waterproof there stucco & metal cladding. Which gave their building a much needed cosmetic facelift.

The project is now complete and the building looks like a million dollars!

"Our clients trust our products because the work."
